FINAL WORDS.....	163

Introduction

The general outcome of a catastrophic event can often be accurately predicted once critical facts are known about the event – even though people affected by the event may not know what is going to happen before it is too late for them to avoid the consequences.

The target of a sniper's bullet is dead from the instant the trigger is pulled – the targeted person just doesn't know it until the instant the bullet strikes.

People living in a low lying area can be in the path of a giant tsunami that will cause a devastating loss of life and property damage – however, without an early warning system they won't know it is going to happen until a killer wave is upon them.

A drowsy or drug-affected driver on a two lane road may be drifting in and out of consciousness – but the people in an oncoming car don't know they are faced with an imminent fatal head on collision.

People in a country can likewise be faced with a catastrophic event – the serious consequences of which they can be oblivious to or ignore until it is too late for them to be avoided.

The Tutsi and Hutu peoples in Rwanda had their differences, but it wasn't until the Hutu's started chopping up every Tutsi they could find with machetes that the Tutsi realized they missed the signs they needed to flee or take other actions to protect themselves from the Hutu's incipient murderous rage.

America is in the midst of a cataclysmic event more than 400 years after Jamestown became the first permanent British settlement: Whites of European ancestry who until recent decades were almost 90% of the population, have been replaced as the majority population in America – they just don't know it yet. The minority status of Whites in America will be officially declared in a few years by the census bureau. This change is momentous because demographics has a profound effect on the destiny of a country. America developed as it did for one fundamental reason: It was settled by highly intelligent and motivated spiritual White Europeans, who from scratch created an advanced civilization in an area that for more than ten thousand years had overwhelmingly been a vast wilderness.

Ninety-eight percent (98%) of immigrants were White Europeans when the Statute of Liberty was built in the mid-1880s. Ninety-four percent (94%) of all immigrants to the U.S. were White Europeans from the early 1800s until the beginning of World War 2 in 1941.

Those White European settlers assimilated into a common American culture with English as its mother tongue.

This is volume one of two volumes that detail the momentous and unprecedented demographic shift happening in real time replacing the White primacy that created America and its advanced culture, with something very different.

This volume provides the demographic data and other relevant facts that identifies America has been irretrievably changed from a land of majority Whites of European ancestry, due to their systematic replacement with non-Whites from non-European countries. The information documenting this momentous transformation is presented in more than 100 tables, charts, and graphs detailing immigration and population data going back more than 200 years. The data is from official sources including the U.S. Census Bureau, the U.S. State Dept., and the Homeland Security Dept.

The relegation of the White race to minority status was foreseeable many decades ago. This book is titled "Bull's Eye" because the demographic change that has occurred in America was a directly predictable consequence of government immigration policies since World War 2: the death of Whites as the national majority was as certain as a marksman firing at a target. Before WW2 immigration to the U.S. was overwhelmingly limited to White Europeans. The immigration gate was cracked open for non-White refugees to legally enter the country as a result of the war. That gate was obliterated by the *Immigration and Nationality Act of 1965*. The demographic shift that begun after WWII accelerated when the flood of non-Whites began pouring into the country after the 1965 law took effect.

The replacement of Whites as a majority of the U.S. population will officially happen no latter than 2037 based on U.S. census data. However, in reality it will happen no later than 2029 based on the median number of illegal aliens in the U.S. determined by a study by MIT Sloan and Yale professors.¹ If that studies high-end estimate of

¹ See, Mohammad M. Fazel-Zarandi, Jonathan S. Feinstein, Edward H. Kaplan. "The number of undocumented immigrants in the United States: Estimates based on demographic modeling with data from 1990 to 2016," Plos One (Plos.org), Sept. 21, 2018. Online at, <https://journals.plos.org/plosone/article?id=10.1371/journal.pone.0201193> . The median estimate is that in 2016 there were 22.1 million illegal aliens in the U.S., and there is a 5% probability there were as many as 29.5 million. ("Our results lead us to the conclusion that the widely accepted estimate of 11.3 million undocumented immigrants in the United States is too small. Our model estimates indicate that the true number is likely to be larger, with an

illegal aliens in the U.S. is correct, Whites will become a minority of the population *before 2029*.

Thus, it can reasonably be expected that by 2029, and officially no later than 2037, Whites will become less than 50% of the population in America as a whole. Whites are already a minority in five states: California, Nevada, New Mexico, Texas, and Hawaii. By 2025 – based on census data – Whites can be expected to be a minority in *at least* ten states, and it could be more.

Whites are expected to be a majority-minority until around 2046, when Hispanics are projected to outnumber Whites nationwide – although that could occur some years sooner. As incredible as it may seem at first glance to people uninitiated about the consequences of the White demographic replacement now underway, it is projected that Asians will outnumber Whites in America in the latter part of the 21st century. That is within the lifetime of a significant percentage of people currently alive in America.

The displacement of Whites and their inevitable future as an ever diminishing minority in America is demonstrated by one fact: Whites are already a minority of children 15 and under. The majority of K-12 students are non-White. Those majority non-White youths are the next generation, and their racial groups have a higher birthrate than Whites. So the countrywide status of Whites as a minority can be expected to accelerate.

The three predominate non-Whites races in the U.S. – the Red race (Called “natives” of North and South America, which includes Hispanics), the Yellow race (Asian descent), and the Black race (African descent) – have radically different cultural values, customs, and even languages than the White Europeans who founded and created America.² Many live in enclaves and cliques in large enough numbers that they are shielded from needing to even attempt to assimilate and become an American. Members of those races are even becoming a U.S. citizen without having undergone *any* American assimilation or knowing English. Being a U.S. citizen is now divorced from being an American. In both spirit and reality, foreigners are spreading throughout the country and replacing Americans while suffocating the American culture and spirit. The U.S. is well on its way to becoming a non-American country.

This situation was created so recently that a significant percentage of the White population was alive in the early 1960s when nationwide they were almost an 87% majority. At that time it was unthinkable to a young White person that within their lifetime official government policies would reduce them to a minority in their country, and that their normative culture would be under constant assault and targeted for systematic destruction.

Volume Two details how this demographic and cultural transformation occurred. It explains the replacement of Whites as the majority race in America was not an accident. It was a predictable consequence of deliberate political actions taken since World War 2, and most dramatically in 1965, when the United States drastically changed its immigration policy from primarily encouraging Whites to settle as they had for more than 350 years, to allowing large numbers of non-whites to legally enter the country – directly, and through chain-immigration of their relatives.³ Post-WW2 non-White immigration also escalated from relaxed entry requirements for people claiming refugee status.

The replacement of Whites in America has such far reaching implications that it can accurately be described as a man-made cataclysmic event. This transformation of America was set in motion by politicians enacting laws carried out by the machinery of government – all done without a public referendum or explicit consent by the people affected.

There is nothing magical about the plains, forests, rivers, and lakes in America. White European settlers created America from land that had been undeveloped by humans in the entire history of the Earth up to the time they arrived. America and its culture was created by the White Europeans who settled here and their ancestors who adopted their values and built upon their achievements. Every other racial group that has arrived has been the beneficiary of the America created by White European primacy. As White culture withers so does America, replaced by something increasingly unrecognizable.

estimated ninety-five percent probability interval ranging from 16.2 to 29.5 million undocumented immigrants.” Id.) An article about the study is: Tom Relihan. “Study: Undocumented immigrant population roughly double current estimate,” [mitsloan.mit.edu](https://mitsloan.mit.edu/ideas-made-to-matter/study-undocumented-immigrant-population-roughly-double-current-estimate), September 21, 2018. Online at, <https://mitsloan.mit.edu/ideas-made-to-matter/study-undocumented-immigrant-population-roughly-double-current-estimate> .

² In the 1878 court case of *In Re Ah Yup*, 5 Sawy. 155 (1878) that concerned a non-White who argued he was eligible for naturalization as a U.S. citizen, the court acknowledged there are five recognized distinct races of human beings: The Caucasian or White race of Europe and Western Asia; the Mongolian or Yellow race of Central and East Asia; The Ethiopian or Negro (black) race of Africa; The Red race of North and South America; and, The Malay or Brown race of the islands of the Indian Archipelago. The ruling was on April 29, 1878 by the Ninth Circuit Court in California with Circuit Judge Lorenzo Sawyer presiding. It is online at,

³ Prior to the radical 1965 revision of the U.S. immigration law, in 1952 the U.S. changed its immigration policy to allow (for the first time) chain migration of a legal immigrants relatives, without them having to individually meet immigration requirements.

U.S. Population By Race – 1790 to 2019

(U.S. Census Bureau population by race and percentage of population by race data.)

From 1790 to 2019 the population of the U.S. increased 84 fold from 3.9 million to 328.2 million. The following chart shows the racial demographics of the U.S. for the 229 years from 1790 to 2019.

It is apparent the U.S. has been a significantly White majority country from its founding in 1789 to the present time. The following data charts illustrate that the 81% White majority in 1790 increased over the next 130 years to a peak of 89% in 1920. The White percentage of the population then began a very slow decline, which increased with the relaxation of Asian and Hispanic immigration due to World War II, and Cuban refugees as a consequence of the Cold War. However, it was still 85% when the 1965 immigration act was passed, relaxing legal immigration from all non-white countries. The White percentage began a swift decline after the 1965 immigration act took full effect in 1968, with a non-stop inflow of non-whites from Asia, Mexico, the Caribbean, Central America, South America, and Africa. By 2019 the white percentage had officially dropped to 60.1% -- and it is estimated that illegal aliens dropped that percentage to the mid-50% range.

In 1920 nationally, the non-White 11% of the population was comprised of 9.9% Blacks and 1.1% other races. By 2019 the non-White percentage had increased almost four-fold to 39.9%, with 12.5% Blacks and 27.4% other races -- including 18.5% Hispanics and 5.8% Asian.

The non-white population increase is indicated by what happened in Los Angeles County from 1920 to 1970 compared to the U.S. as a whole. The Hispanic population in the U.S. was 700,541 in 1920, while it was 1,008,005 in Los Angeles County *alone* just 50 years later in 1970.

The Asian population likewise exploded in the U.S. from 1920 to 1970. In 1970 Los Angeles County had almost as many Asians as were in the entire United States only 50 years earlier: in 1920 there were 181,738 Asians in the U.S., while in 1970 there were 178,335 Asians in Los Angeles County.

U.S. Census From 1790 To 2019 By State And Race

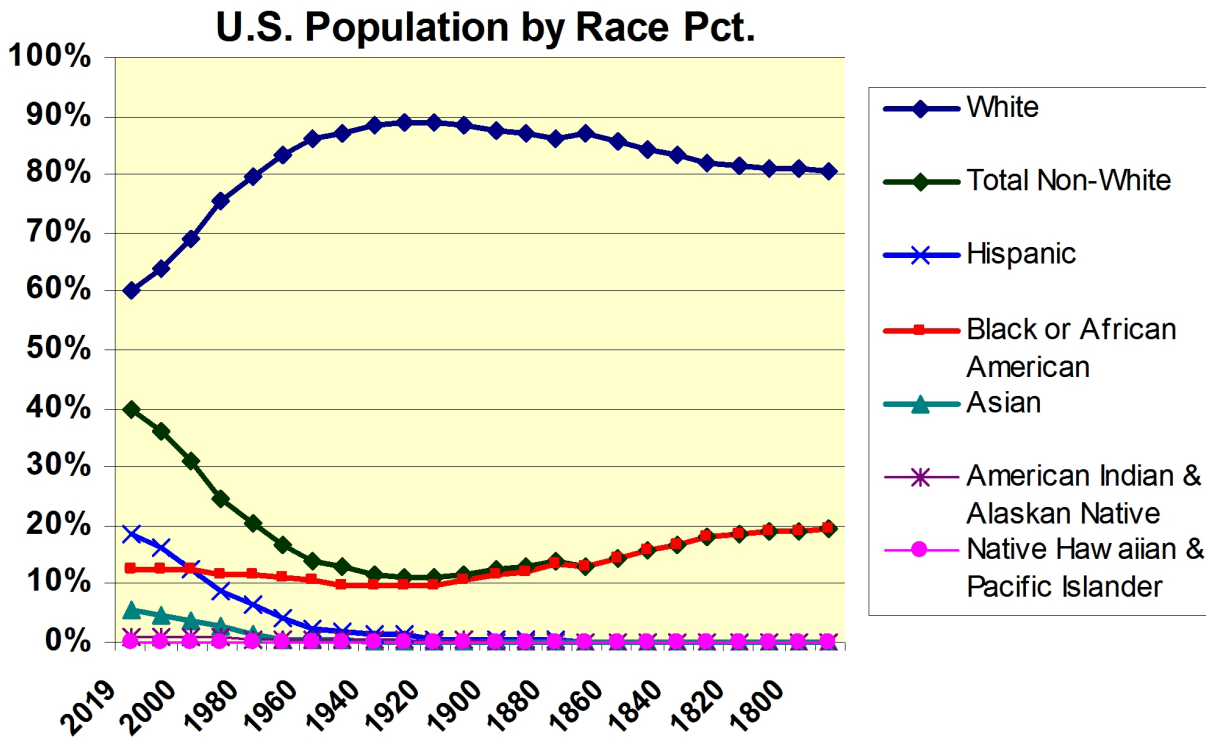

The U.S. Census conducted nationwide every ten years since 1790, is an official source of data to track the change in the racial make-up of each state over the last 230 years.

The 81% White majority in 1790 increased to a peak of 89% in 1920. The White majority decreased to 87.2% in 1950, 69.1% in 2000, and 60.1% in 2019.

The Black minority peaked at 19% in 1790, and has been relatively stable at between 10% and 12% from 1900 to 2019.

Hispanics were 0.1% of the population in 1850, 0.5% in 1900, 2.1% in 1950, 12.5% in 2000, and 18.5% in 2019.

Asians were 0.0% of the population in 1850, 0.1% in 1900, 0.4% in 1950, 3.6% in 2000, and 5.8% in 2019.

Under-Reported Illegal Aliens Will Make Whites Minority Before 2030

(Based on Census Bureau records plus MIT and Rutgers median estimate there were 22,100,000 illegal aliens in the U.S. in 2016)

Based on the U.S. population trends from 2000 to 2019 the following can be projected based on the median estimate by MIT and Yale University about the number of illegal aliens in the U.S.:¹

- Whites will become a minority of the U.S. population by 2029 *at the latest*. (Based on the highest estimated number of illegal aliens in the U.S., Whites could become a minority as early as 2024.)
- Whites will be less than 40% of the population by 2044.
- Hispanics will exceed Whites as the largest minority-majority racial group by 2046.
- Whites will be less than 30% of the population by 2059, while Hispanics will be approaching 50%.
- Hispanics will be a majority of people in the U.S. by 2065.
- Whites will be less than 20% of the population by 2073.
- About 2085 Asians will outnumber Whites in the U.S.
- Considering the aging demographics of the White population compared to the Hispanic and Asian population, and the large number of illegal aliens entering the U.S. annually, these events could happen sooner than projected in this table.
- Asians will be a greater percentage of the U.S. population than Blacks by 2072.

Whites Will Be Minority In U.S. By 2038 Based On Census Data

(Based on Census Bureau records)

Based on U.S. Census Bureau data for the population trends from 1990 to 2019, the following can be projected:

- Whites will become a minority of the U.S. population by 2038.
- Hispanics will exceed Whites as the largest minority in the U.S. by 2068.
- Considering the aging demographics of the White population compared to the Hispanic population, and the large number of Hispanic illegal aliens entering the U.S. annually, the replacement of the Whites so they become the majority minority, and then an absolute minority, could happen much sooner than projected in this table.

Year	White	Hispanic	Black	Asian	Other

Racial Make-Up Of States — 1790 to 2019

The following are three sets of charts for each of four racial groups: Whites; Blacks; Hispanics; and Asians; and also for total Non-Whites.

The first chart is of the group's population in a state for each relevant ten year period from 1790 to 2019.

The second chart is of the group's percentage of the population in a state for each relevant ten year period from 1790 to 2019.

The third chart ranks each group's population percentage by state for each relevant ten year period from 1790 to 2019.

From 1790 to 1950 all states considered to be a part of the North during the war against the southern states (1861-1865) .were more than 90% White. Many of those states were more than 95% White.

In 1970 23 states were more than 90% White, and three states were more than 99% White: Vermont; New Hampshire; and Maine. One state had a population less than 50% White: Hawaii.

By 2019 only three states were more than 90% White: Maine; Vermont; and West Virginia. While five states were less than 50% White: Nevada; Texas; New Mexico; California, and Hawaii.

White Population By State

State	1890	1880	1870	1860	1850	1840	1830	1820	1810	1800	1790

Racial Population By U.S. Region – 1790 - 2019

(U.S. Census Bureau estimates 2019)

The White majority of regions throughout the country did not appreciably change in the 19th century. However, beginning in the mid-20th century, and accelerating after 1965, that began to change significantly. That change has occurred in all regions of the U.S., but most markedly in the region of the southern border states -- Arizona, California, New Mexico, and Texas -- and Nevada, which in 1920 was a solid 82% White majority, while in 2019 it had been more than halved to 40% minority White. That replacement has continued at the rate of 1/2% per year from 2000 to 2019.

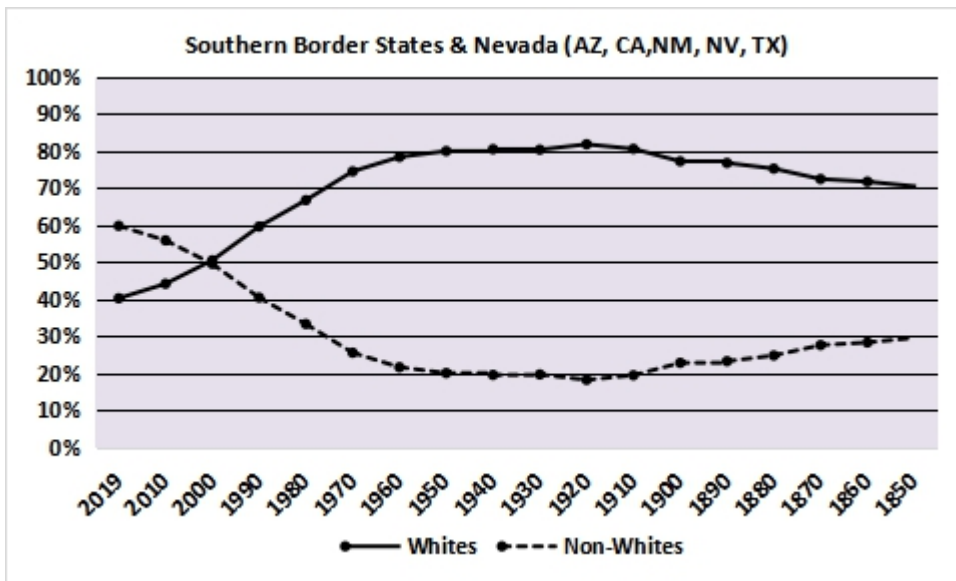

The decline is also dramatically reflected in the regions that formerly had the highest percentage of Whites. For example, the six mid-Atlantic states -- Delaware, Maryland, New Jersey, New York, Pennsylvania, and West Virginia -- were 96% White in 1920, while in 2019 they were 61%, and decreasing at the rate of almost 1/2% per year. Another example are the three Pacific northwest states -- Washington, Oregon and Idaho. They decreased from 98% White in 1920 to 71% in 2019, and the White percentage is decreasing at the rate of almost 1/2% per year.

The decline has been least dramatic in the eleven southeastern states which in 1920 had the highest concentration of non-Whites. They were 66.9% White in 1920, while in 2019 they were 61% -- but after peaking at 77% in 1970, the White population has declined an average of about 1/3% per year.

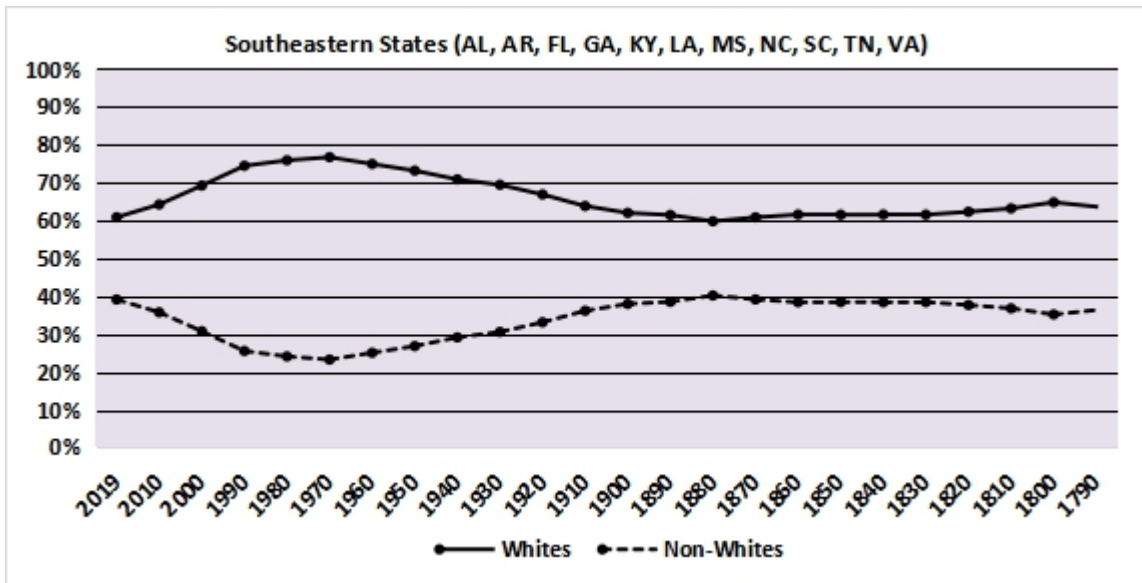

In contrast to the overall 6% decline in the White population in the eleven southeastern states, there has been a dramatic 35% decline in the White population outside those states -- from over 95.2% in 1920 to 59.8% in 2019.

Racial Population Growth/Loss In U.S. States

The demographic change in the U.S. is shown by the growth or loss of each state's population by race in the following charts for the periods from 1920 to 2019; 1960 to 2019; 1990 to 2019; and 2010 to 2019.

From 2010 to 2019:

- * Net reduction in the White population in the U.S..
- * White population decreased in 27 states.
- * Hispanic population increased in all 50 states and the District of Columbia.
- * Black population increased in 47 states and the District of Columbia.
- * Asian population increased in 49 states and the District of Columbia.
- * Hispanic population increase exceeded white population increase in thirty-nine states from 2010 to 2019.
- * Blacks population increase exceeded white population increase in thirty-seven states from 2010 to 2019.
- * Asian population increase exceeded white population increase in thirty-five states from 2010 to 2019.
- * Non-white population increase exceeded white population increase in 48 states and the District of Columbia.

From 1990 to 2019:

- * Hispanic population increase exceeded white increase in twenty-eight states from 1990 to 2019.
- * Blacks population increase exceeded white population increase in twenty-one states from 1990 to 2019.
- * Asian population increase exceeded white population increase in eighteen states from 1990 to 2019.
- * Non-white population increase exceeded white population increase in 42 states and the Dist. of Columbia.

From 1960 to 2019:

- * Hispanic population increase exceeded white population increase in nineteen states from 1960 to 2019.
- * Blacks population increase exceeded white population increase in twelve states from 1960 to 2019.
- * Asian population increase exceeded white population increase in twelve states from 1960 to 2019.
- * Non-white population increase exceeded white increase in thirty-three states from 1960 to 2019.

From 1920 to 2019:

- * Hispanic population increase exceeded white population increase in eight states from 1920 to 2019.
- * Blacks population increase exceeded white population increase in two states from 1920 to 2019.
- * Asian population increase exceeded white population increase in one state from 1920 to 2019.
- * Non-white population increase exceeded white increase in nineteen states and the District of Columbia.

From 1860 to 2019:

- * Hispanic population increase exceeded the white population increase in one state (California) from 1860 to 2019.
- * Non-white population increase exceeded white population increase in nine states and the District of Columbia from 1860 to 2019.

2010-2019 Racial Population Growth/Loss In U.S. States

Population growth or loss from 2010 to 2019 by Race

Population percentage growth or loss from 2010 to 2019 by Race

The chart above shows:

Hispanic population increase exceeded white population increase in twenty-eight states from 1990 to 2019.

Blacks population increase exceeded white population increase in twenty-one states from 1990 to 2019.

Asian population increase exceeded white population increase in eighteen states from 1990 to 2019.

Non-white population increase exceeded white population increase in 42 states and the District of Columbia.

The chart below shows:

Hispanic population increase exceeded white population increase in nineteen states from 1960 to 2019.

Blacks population increase exceeded white population increase in twelve states from 1960 to 2019.

Asian population increase exceeded white population increase in twelve states from 1960 to 2019.

Non-white population increase exceeded white population increase in thirty-three states from 1960 to 2019.

The chart above shows:

Hispanic population increase exceeded white population increase in eight states from 1920 to 2019.

Asian population increase exceeded white population increase in one state from 1920 to 2019.

Blacks population increase exceeded white population increase in two states from 1920 to 2019.

Non-white population increase exceeded white population increase in nineteen states and the District of Columbia from 1920 to 2019.

The chart below shows:

Hispanic population increase exceeded white population increase in one state (California) from 1860 to 2019.

Non-white population increase exceeded white population increase in nine states and the District of Columbia from 1860 to 2019.

Racial Make-Up of U.S. Counties – 1990-2019

The change in the racial make-up of U.S. counties from 1990 to 2019 demonstrates the radical demographic shift occurring in the U.S.

The following charts show that from 1990 to 2019:

Counties with a 99% or more White population dropped from 11% to zero (332 counties to 0).

Counties with a 97% or more White population dropped from 32% to less than 1% (999 counties to 28).

Counties with a 95% or more White population dropped from 43% to 8% (1,345 counties to 277) .

Counties with a 90% or more White population dropped from 57% to 33%. (1,779 counties to 1,034)

Counties with a 70% or more White population dropped from 81% to 68%. (2,539 counties to 2,149)

Counties with a 50% or more White population dropped from 94% to 88% (2,951 counties to 2,751)

Counties across the country that for generations have been virtually all White, are undergoing dramatic demographic change.

Large counties illustrate the diminishment of the White population to minority status. Only two of the most populous 21 counties have a White population exceeding 50%: Maricopa County, AZ (Phoenix) (4th) and Clark County, NV (Las Vegas) (13th). Thirty one of the 50 most populous counties have a White minority.

The largest White majority in the 50 most populous counties is 78% in Allegheny County, PA (Pittsburgh) and 73.6% in Pinellas County, FL (Tampa–St. Petersburg). The smallest minority is 9% in Bronx County, NY (New York City) and 12.9% in Miami-Dade County, FL (Miami).

In 2019, 33 counties had 97% or more Whites, with Jackson County, Kentucky's 97.8% the highest. Texas had eight of the ten counties with the lowest percentage of Whites, with Maverick County, Texas the lowest at 2.7% Whites.

In 2010, 236 counties had 97% or more Whites, with Blaine County, Nebraska's 99.2% the highest. Texas had eight of the ten counties with the lowest percentage of Whites, with Kuskilvak Census Area, Alaska the lowest at 2.7% Whites.

In 2000, 525 counties had 97% or more Whites, with Slope County, North Dakota's 99.6% the highest. Texas had eight of the ten counties with the lowest percentage of Whites, with Starr County, Texas the lowest at 2.0% Whites.

In 1990, 999 counties had 97% or more Whites, with Slope County, North Dakota and Worth County, Missouri tied at 100% for the highest. Texas had seven of the ten counties with the lowest percentage of Whites, with Starr County, Texas the lowest at 2.4% Whites.

California's State and County Population By Race

California was 86% White when it became a state in 1850.

The White population peaked at 92% in 1920. The Hispanic, Asian, and Black populations were 3.5%, 3.1% and 1.1% respectively.

The White population was gradually decreasing, but it was still 83% in 1960. Hispanics were steadily increasing, and had reached 9% of the population; Asians were quasi stable at 2%, and beginning with WWII Blacks had tripled to 5.6%.

By 1990 White's had decreased to 57%, while Hispanics had increased to 26%, Blacks had slightly increased to 7%, and Asians had more than quadrupled to almost 9% of population.

By 2000 White's had decreased to being a majority-minority at 46.7%. Hispanics had increased to about 1/3 of the population at 32.4%

By 2019 Whites had decreased to being the second largest minority at 36.5%, with Hispanics the largest at 39.4%. Asians outnumbered Blacks by approaching 3 to 1: 14.9% to 5.6%. The White population decreased more than 2-1/2 million from 1990 to 2019 to a total of about 14.5 million. Hispanics more than doubled to a population exceeding 15.5 million.

In less than 100 years Whites went from being the overwhelming majority of Californians, to being a rapidly decreasing minority population. Hispanics went from being a small minority to being the largest minority, and on track to be the majority population in the foreseeable future.

Los Angeles County Population History – 1900 - 2019

(U.S. Census Bureau records)

White's were a 91% majority Los Angeles County's population in 1900.

White's were a 92% majority in 1920.

White's remained a 89% majority in 1940. Hispanics were 6% of the population.

White's were still an 81% majority in 1960, with Hispanics 10%, Blacks 7.5%, and Asian's 1.5% of the population.

In 1990, just 30 years later, the White percentage was cut in half to 41%. Hispanics were 37%, Blacks 11%, and Asians 10% of the population.

By 2019, White's had fallen to 28% of the population. Hispanics had increased to 48%, Blacks had reduced to 8%, and Asians had increased to 14% of the population.

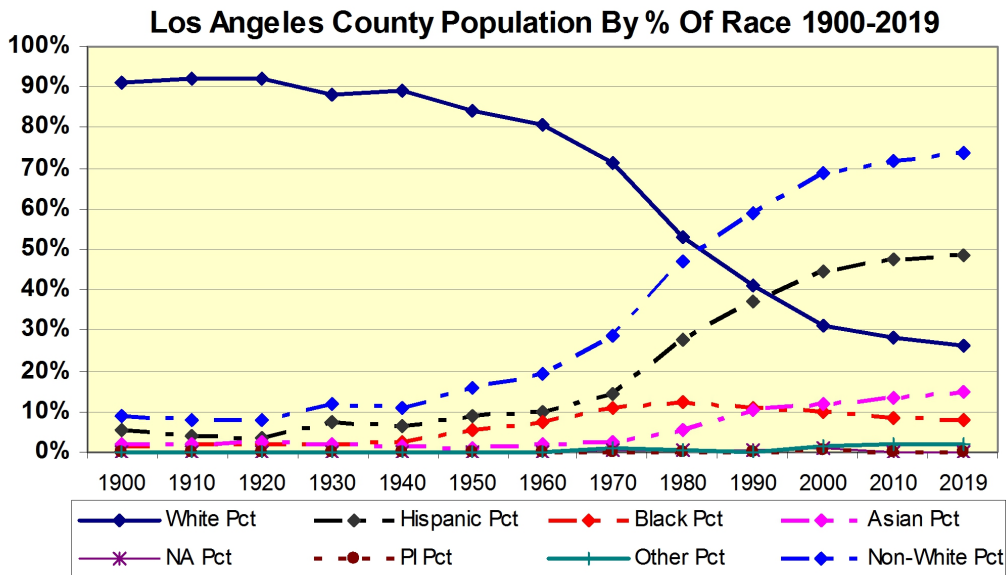

The dramatic drop of Los Angeles County's White population from 1940 to 2019 of more than 300% was not just mirrored in other California counties, but in other counties in the four states bordering Mexico and Nevada.

Note 1: 3,572 were Chinese and 35,390 were Japanese.

Note 2: Estimated.

Note 3: Estimate based on the almost 200,000 Mexicans who were brought to east Los Angeles County by the Bracero program instituted by the American and Mexican governments to ease agricultural labor shortages during World War Two.

Population Of Mexican Territory U.S. Took Control From 1845 To 1854

Mexico at the beginning of 1836 included all of six present day states: California; Nevada; Utah; Arizona; New Mexico; and Texas. It also included parts of four present day states: Wyoming, Colorado, Kansas, and Oklahoma. Mexico's territory in 1836 is shown in all the shaded and diagonal lined areas in the map below.

Erosion of Mexico's territory began in 1836 when an area that encompassed all of present-day Texas, and parts of present day New Mexico, Wyoming, Colorado, Oklahoma, and Kansas, seceded and declared independence as the Republic of Texas. Mexico claimed all of that area was its territory except for western Texas that comprises about one-third of present-day Texas (The diagonal lined area in the map below was the undisputed part of Texas.). All of the rest of that area was disputed territory claimed by both Mexico and the Republic of Texas (The light grey area in the map below.). In April 1844 the Republic of Texas entered into a Treaty of Annexation with the United States. On December 29, 1845 the Republic of Texas was admitted as the state of Texas. The Republic of Texas officially ceased to exist on February 19, 1846 when it became the state of Texas.⁴ Mexico continued to assert it had a historical claim to all the disputed territory.

After President James Polk took office in 1845, he began an effort for the U.S. to purchase from Mexico the disputed area in Texas and the present-day states of New Mexico and California. When those efforts failed, the U.S. relied on the pretext of minor border skirmishes to declare war on Mexico on May 13, 1846.⁵ The U.S. invaded Mexico, and following the capture of Mexico City in September 1847, President Polk's emissary with the State Department, Nicholas Trist, began negotiations for a peace treaty with the Mexican Government. On February 2, 1848, Mexican officials signed the Treaty of Guadalupe-Hidalgo in Mexico City, which Trist presented to Polk. "Under the terms of the treaty, Mexico ceded to the United States approximately 525,000 square miles (55% of its prewar territory) in exchange for a \$15 million lump sum payment, and the assumption by the U.S. Government of up to \$3.25 million worth of debts owed by Mexico to U.S. citizens."⁶

On March 10, 1848 the U.S. Senate ratified the treaty, officially ending the Mexican-American war. Under the treaty Mexico relinquished its claim to the Texas territory that encompassed part of five present-day states (the light gray area in the map below), and it "sold" the entirety or part of seven present-day states shown in dark gray in the map below: California, Nevada, and Utah in their entirety, and Arizona, New Mexico, Wyoming and Colorado in part..

In 1850 Texas' current boundaries were established by the Compromise of 1850, in which in exchange for \$10 million from the federal government Texas ceded all claims in the disputed (light grey) area that are now part of present-day New Mexico, Oklahoma, Kansas, Colorado, and Wyoming.⁷

The 1848 Treaty of Guadalupe-Hidalgo didn't end the quest for Mexican territory by the U.S. A proposed route for a railroad connecting San Diego to El Paso traveled through a part of northern Mexico. In 1853 U.S. President Franklin Pierce had his Minister to Mexico, James Gadsden, negotiate with Mexico's President Santa Anna for the purchase of land that would allow construction of the railroad. Santa Anna agreed to the sale of 45,000 square miles of land along Mexico's border with Arizona and New Mexico for \$15 million. However, the U.S. Senate would only agree to a downsized purchase of 29,670 square miles for \$10 million. President Pierce signed the treaty, and Santa Anna signed it on June 8, 1854.⁸ The U.S. southern border established by the treaty has been unchanged since 1854. The proposed railroad wasn't built, but in 1881 the Southern Pacific Railroad completed its tracks from southern California to El Paso.⁹

After the U.S. took over administration of former Mexican territory, the population of White settlers dwarfed the number of Mexicans (Hispanics) and other non-Whites in the states that were formed from that

territory. However, that began to change somewhat after 1950, and the decline of the White percentage of the population accelerated after 1970. California and Texas are illustrative of this trend:

- In 1850, Whites were 86% of the population and Mexicans were almost 13%.
- In 1900, Whites were 89% of the population, Mexicans were 5%, and Asians were 4%.
- In 1950, Whites were 87% of the population, Mexicans were 7%, and Asians were 2%.
- In 1970, Whites were 77% of the population, Mexicans were 12%, and Asians were 2.5%.
- In 2000, Whites were 47% of the population, Hispanics were 32%, and Asians were 11%.
- In 2019, Whites were 36% of the population, Hispanics were 39%, and Asians were 15%.

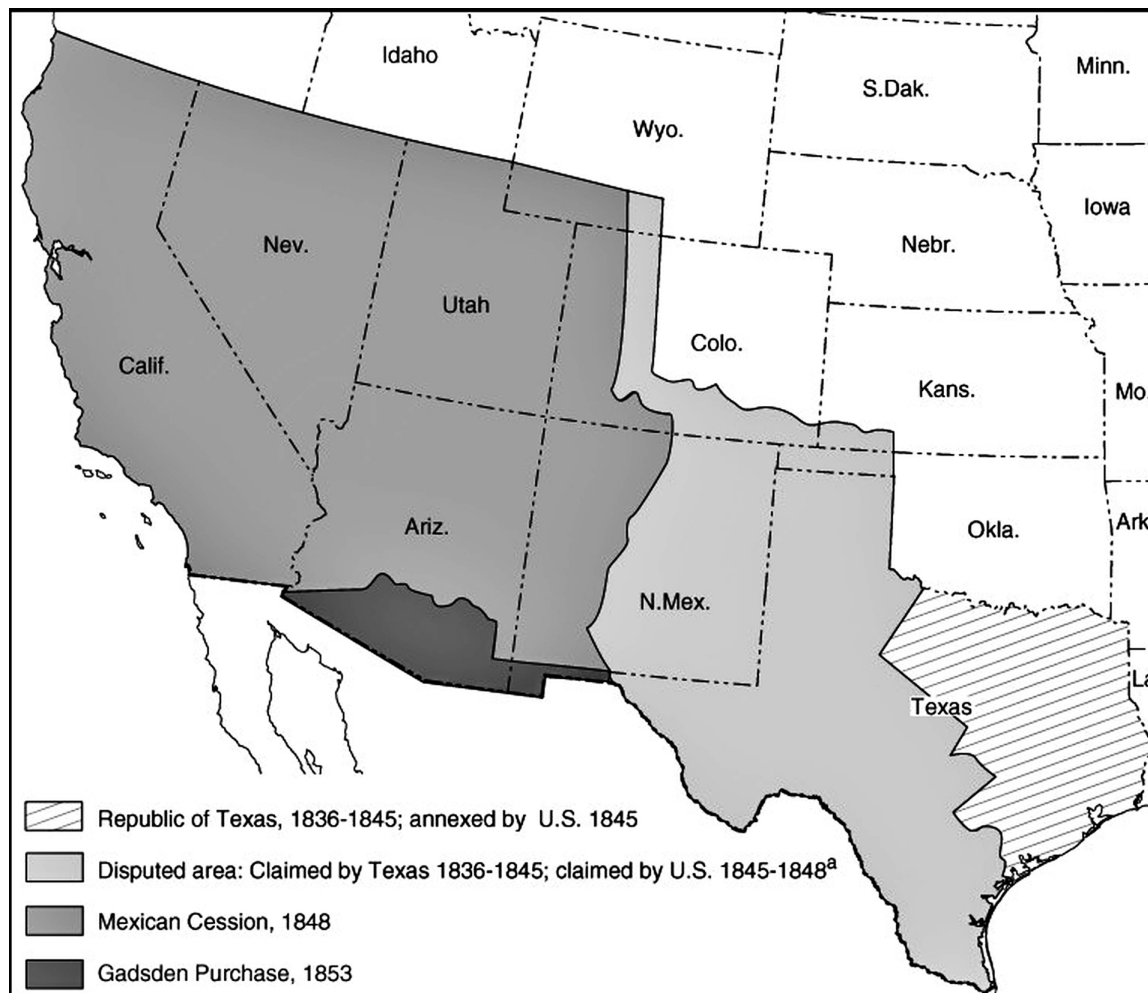

Texas' path was a bit different, but with a similar end result:

- In 1850, Whites were 64% of the population. Mexicans were 9%, and Blacks were 27%.
- In 1900, Whites were 71% of the population, Mexicans were 8%, and Blacks were 20%.
- In 1950, Whites were 74% of the population, Mexicans were 13%, and Blacks were 13%.
- In 1970, Whites were 71% of the population, Mexicans were 16%, and Blacks were 13%.
- In 2000, Whites were 52% of the population, Hispanics were 32%, Blacks were 12%, and Asians were 3%.
- In 2019, Whites were 41% of the population, Hispanics were 40%, Blacks were 12%, and Asians were 5%.

California and Texas both have white populations that have collapsed from being a significant majority of the population, to being a rapidly decreasing minority.

Mexico is quasi-reclaiming the territory it lost after 1835. Four of the six entire states created from its former territory are now White minority: California; Texas, Nevada; and New Mexico. Arizona will be White minority by 2025, but Utah won't because it has a large White Mormon population.

Map shows area of present states that were part of Mexico in 1835 (shaded or diagonal lines)

2019-1990 Population In Territory Mexico Ceded In 1848 Treaty of Guadalupe & 1854 Gadsden Purchase

Since 1990 the decrease in the White population has been pronounced in both the areas of the U.S. that were formerly Mexican territory, and the areas that were never Mexican territory. The following charts show Whites are barely above 40% of the population in the later areas, and less than 2/3rds of the population in the former areas, as of 2019.

2019-1990 Total Population In Formerly Mexican Territory

Year	Population	White	Hispanic	Black	Asian	Native American	Pacific Islander	Other	Total Non-White	White Pct	Hispanic Pct	Black Pct	Asian Pct	NA Pct	PI Pct	Other Pct	Non-White Pct

Immigration To U.S. 1820 To 2019

Whites overwhelmingly were the immigrants to the U.S. for the 120 years from 1820 (when records began being kept) until the beginning of World War II. Whites comprised about 94% of all immigrants during those 120 years. From end of World War II to 1965 the percentage of White immigrants was 66%. Since 1965 White's have comprised 16% of immigrants, and they have comprised less than 10% of immigrants in recent years.

That immigration resulted in the U.S. reaching a peak White population of 89% in 1920, and it was still 86% in 1960. Sixty years later it had been reduced by almost one-third, to 60%.

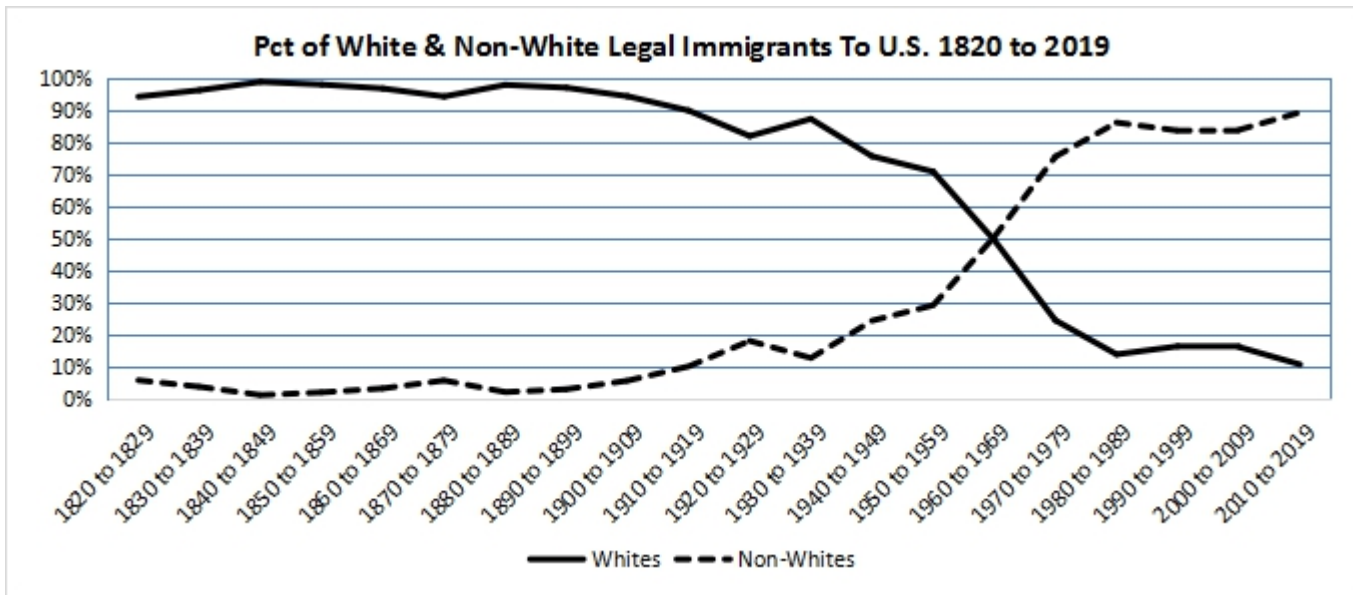

The chart below shows that for the 100 years from 1820 to 1919 Whites were 90% or more of all immigrants. From 1920 to 1940 they were over 80% of immigrants, and from 1940 to 1960 they were over 70% of immigrants. After 1960 White immigration collapsed below 50%, and by 2019 had dropped to 10%.

Pct Immigration By Whites, Asians, And Others From 1820 To 2019

(Data from Statistical Abstract of the United States -- US Census series 1878 to 2012, and annual Yearbook of Immigration Statistics, U.S. Dept of Homeland Security.)

The following graph is a visualization of White and non-White immigration from 1820 to 2019. It shows that after 1960 White immigration to the U.S. drastically decreased, falling to around 10% by 2019.

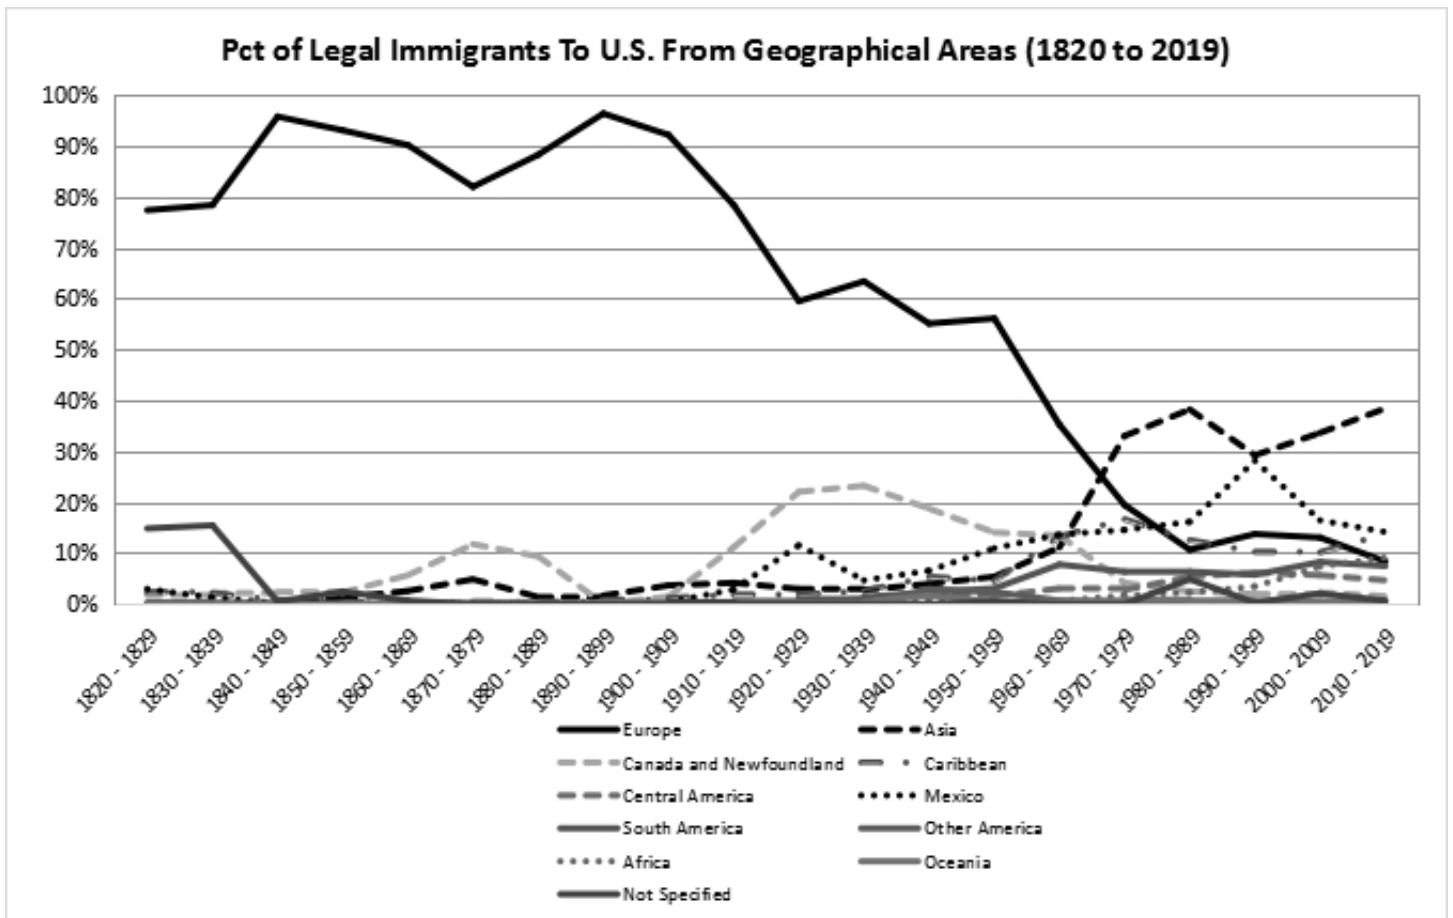

The following chart shows that from 1820 to 1960 the numerical majority of immigrants to the U.S. were from Europe. The peak of that percentage was from 1840 to 1910 when the 10 year total of European immigration varied from a high of 96.5% to a low of 82.1% of all immigration. The Statue of Liberty was dedicated in 1886, and 98.4% of all U.S. immigrants were from Europe in 1885 when its pedestal was being constructed.

The charts on the next page show that over 90% of immigrants from 1820 to 1965 were White, while in contrast, only 16% of immigrants from 1966 to 2019 were White. The reason 1965 is the demarcation point is the 1965 immigration act threw the door open to large-scale legal immigration from non-White countries.

Since 1965 an average of almost 700,000 non-Whites a year have been allowed to legally immigrate to the U.S., while prior to 1965 the average of about 29,000 per year was *24 times less!*

Birth Rates By Race — 1900-2019

The birth rate of White, Blacks and Hispanics has changed significantly since 1900.

In 1900 the White birth rate was 26.4 per 1000 Whites. In 1950 it was similar at 24.1, and it was relatively unchanged in 1960 at 23.7. However, it then began a precipitous decline:

1970 -- 18.4

1980 -- 15.9

1990 -- 16.7

2000 -- 14.4

2010 -- 13.0

2019 -- 11.4

Those lowering birth rates since 1970, combined with reduced immigration by Whites, initially resulted in a slowing of the number of Whites in the U.S., but their population is now decreasing.

1970 -- 169,250,579

1980 -- 180,271,449

1990 -- 188,143,817

2000 -- 194,552,774

2010 -- 197,318,956

2019 -- 197,309,822

That decreasing population trend can be expected to continue with the White population aging, and a reduced number of Whites of child-bearing age are giving birth to fewer children.

While the birth rate of Blacks has reduced from 25.1% in 1970 to its current rate of 13.8%, it is high enough that their population continues to be stable or slightly increase each year.

While the birth rate of Hispanics has reduced from 1970 to its current rate of 14.3%, it is high enough that their populations continues to increase significantly each year when combined with immigration from Central and South America, and the Caribbean.

Population and Percentage of U.S. By Age & Race 1960 to 2019

Since 1960 when White's comprised 86% of the U.S. population, it fell precipitously to 79.6% in 1970. That percentage has since fallen by close to 10% every two decades, down to 60.1% (officially) by 2019. So in less than 60 years there has been a free fall in the White population by almost 1/3.

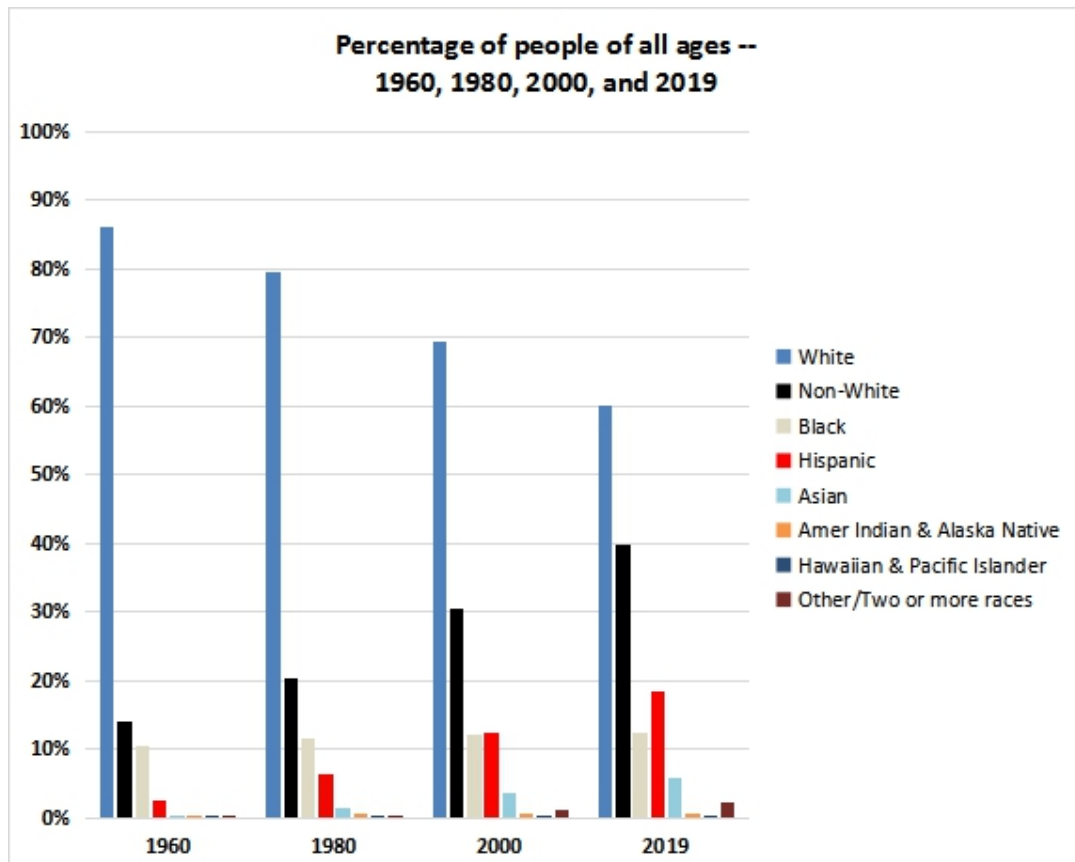

The following charts and graphs illustrate the population and percentage of all ages by race, and by the age groups 0 to 14, 15 to 44, 45 to 64, and 65 and older.

The percentage decrease of the White population in all those age groups has not been by spits and spurts, but it has been a straight line decline. The most pronounced decrease has been in the 0 to 14 age group, in which Whites became a minority for the first time in 2019: and the White percentage of that population group declined by more than 1/2% per year during the six decades from 1960 to 2019.

With an aging of the White population, the percentage decrease of people 65 and older has been less than the other age groups, but from 2000 to 2019 their percentage was declining by about 1/3% per year.

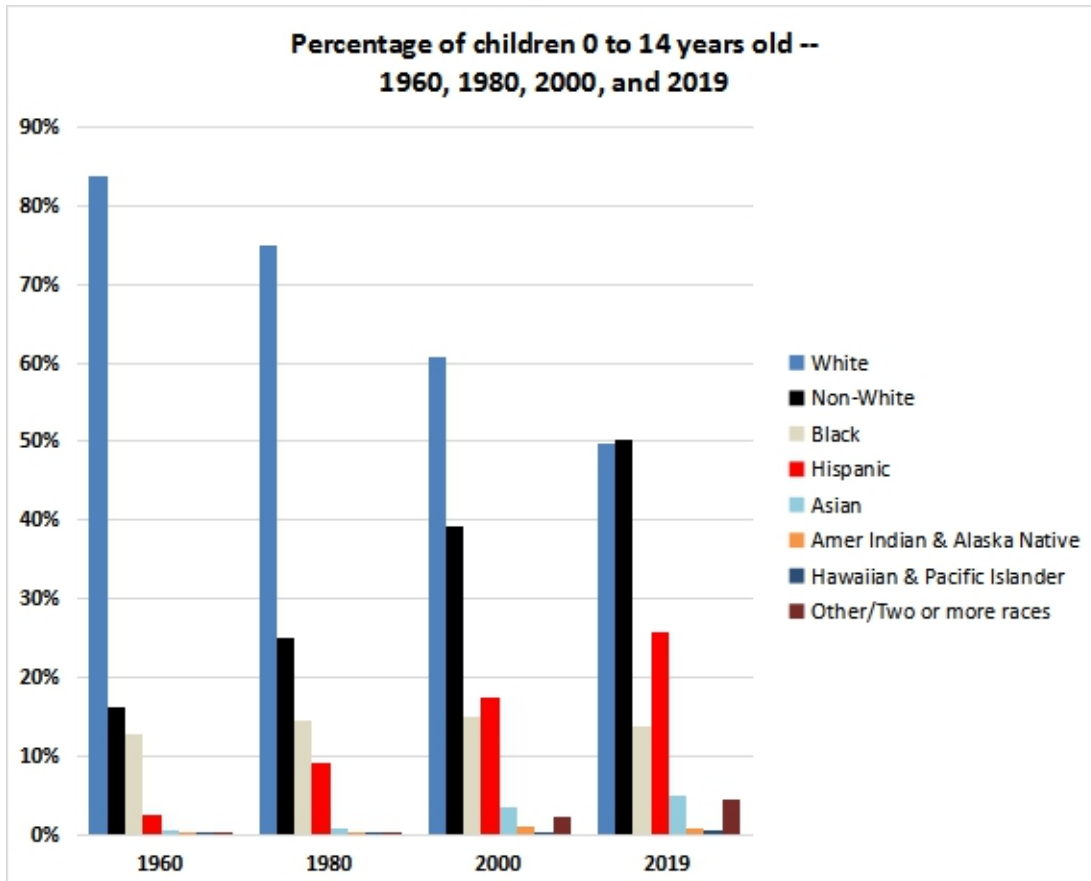

Population and Pct of All Ages By Race 1960 to 2019

Difference in Population & Percentage By Age & Race 1960 to 2019

The collapse of the White population from 1960 to 2019 is illustrated by the difference in the population and percentage of the population by age and race during those years.

From 1960 to 2019 Whites constituted 28.9% of the total population increase, while non-whites were 71.1% of the increase.

From 1960 to 1990 Whites constituted 50% of the total population increase, while non-whites also were 50% of the increase.

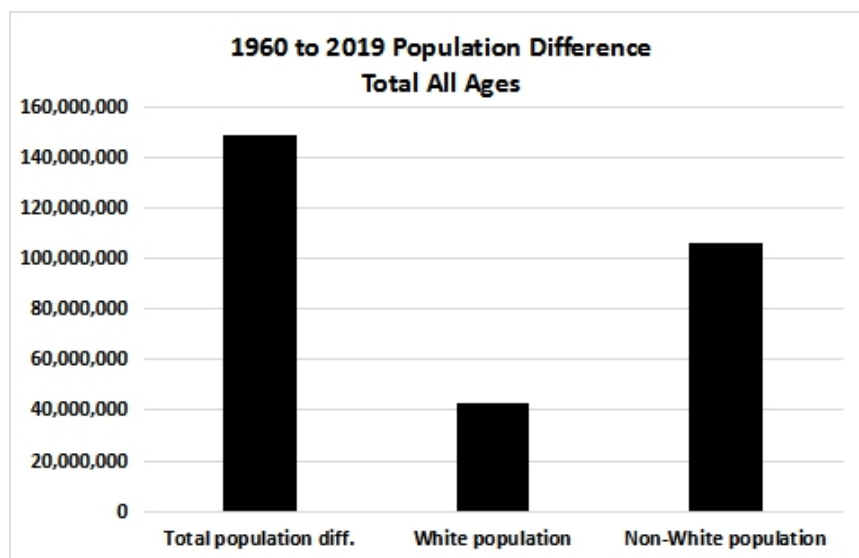

From 1990 to 2019 Whites constituted 10.7% of the total population increase, while non-whites were 89.3% of the increase.

From 2010 to 2019 the White population decreased by 0.1%, while non-whites were 100.1% of the total population increase.

Difference in Population and Pct of All Ages By Race 1960 to 2019

(Population increase or decrease)

Total all ages										Percentage of population increase/decrease

Difference in Population and Pct of 15 to 44 Year-Olds By Race 1960 to 2019

The White population of 15 to 44-year-olds increased by 10,346,036 from 1960 to 2019, while the non-White population increased by 49,069,411. However, all of the White increase occurred from 1960 to 1980. From 1980 to 2019 the White population *decreased* by 11.4 million, while the non-White population increased by 36.5 million. That is a difference of 47.9 million -- or more more than 1 million per year.

That long-term trend was evident from 2010 to 2019, with a decrease in the White population by 2,595,711, while the non-White population increased by 7,115,109. That is a difference of 9.71 million people -- or more than 1 million per year.

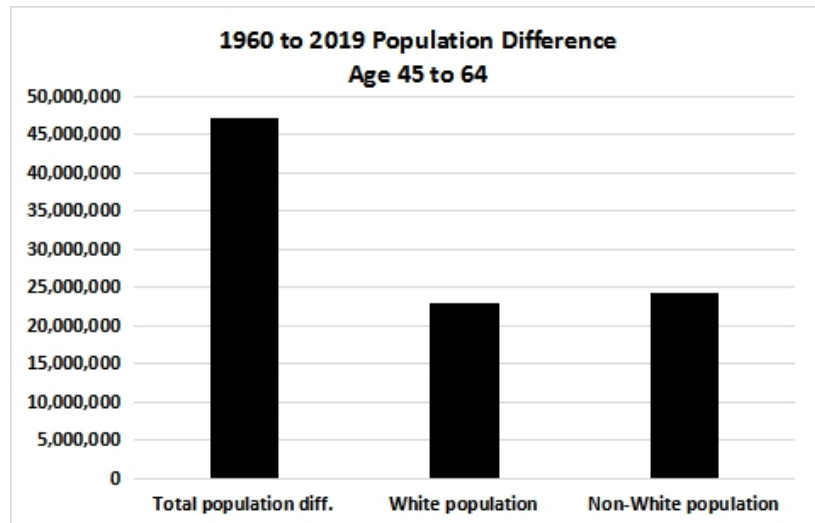

4-9 = Age 15 to 44

Difference in Population and Pct of 65 Year-Old and Older By Race 1960 to 2019

The White population of people 65 and older increased by 26,292,198 from 1960 to 2019, while the non-White population increased by 11,130,173.

The aging of the White population resulted in that long-term trend continuing from 2010 to 2019, with an decrease in the White population by 8,912,444, while the non-White population increased by 4,874,600. For the near term, the While U.S. population 65 and older will continue to exceed non-Whites.

14-18 = Age 65 or older									
	Total	White population	Non-White	Black	Hispanic	Asian	American Indian and Alaska Native	Native Hawaiian and Pacific Islanders	Two or more races
1960 to 1980	8,913,535	7,095,338	1,818,197	880,073	269,056	397,957	159,668	25,651	85,793

Final Words

From multiple angles the foregoing charts and graphs of government data portrays the unmistakable truth: the systematic replacement of Whites as the majority race in America has been ongoing since World War II, and it accelerated after the mid-1960s. With the current minority status of Whites under 15, the die is cast for Whites to be an absolute minority in the near future. This trend is having a momentous effect across the U.S. Federal and state laws and policies are deliberately targeted at making Whites second-class citizens by crippling them educationally, professionally, financially, and culturally. As disrespect for White people continues to be politically fashionable, the myriad ways in which Whites are hamstrung will intensify.

South Africa has been pointed to as a model for where the U.S. is headed with its virulent anti-White policies: See for example, *Into the Cannibal's Pot: Lessons for America from Post-Apartheid South Africa* by Ilana Mercer (Bytech Services, 2012). White European settlers created a first-world South Africa from what had been an undeveloped wilderness before their arrival -- exactly what White European settlers did in the wilderness of North America. Since 1994 when Whites were removed from political control in South Africa, their vilification and removal from positions of importance has predictably resulted in South Africa's degeneration into a violent, and increasingly backward country.

The working title of this book was *America Is Dead: A Fatal Wound Was Inflicted By Post-WWII Immigration Policy*. Only time will tell the ultimate consequences from the legal defilement and systematic replacement of Whites who are America's founders and the creators of its culture. However, it can be expected those effects will be profound, and likely catastrophic for many people.
